Maintenance, Services and Panels

Complete and certified services
for all your technical equipment:
from installation to maintenance

Extensive expertise in many different sectors

ENGIE Fabricom Maintenance, Services and Panels offers you a wide range of solutions for your technical installations. With our expertise you can ensure the efficiency, reliability and availability of your devices, machines and industrial processes. Our teams are driven by the need to deliver quality performance, service optimization and customer satisfaction. They develop a customized approach for you requirements, while paying full attention to safety, health and the environment.

ENGIE Fabricom Maintenance, Services and Panels is active in the following sectors:

Automotive

Construction

Chemistry

Energy

Pharmaceuticals

Infrastructure

Shipping

Government

Petrochemicals

Steel industry

Incinerators

Food & drink

Experienced specialists

The strength of ENGIE Fabricom Maintenance, Services and Panels is inherent firstly in its employees. Our experienced engineers and technicians can effectively deal with your specific problems. But we also have experts for standard work. We always start by understanding your needs and work towards solutions that conform to them.

At your site or in our fully-equipped workshops

Maintenance, overhaul and repairs are done in our own workshops or at your site. Our workshops feature most modern equipment. They can handle large volumes and dimensions, specific techniques and measurements, scanning and 3D printing. We also have the necessary measuring and testing equipment. For maintenance, overhaul and repair on site we have mobile units and, if requested, we can outsource a pool of technicians.

Certified environment and processes

We are equipped and organised to conform to the most demanding quality standards. Our own workshops are certified facilities: each workshop meets the ISO 9001 and ISO 14001 standards. In addition, we are certified to perform work in specific fields such as the nuclear sector or petrochemical industry.

High capacity and flexibility

As part of a large European organization, we can handle high volumes, in part because we have access to a large material inventory and a responsive logistical operation. We're organised into smaller, specialised units, which also makes us highly flexible. This adaptability allows us to can handle smaller assignments, which sometimes require very specific knowledge, quickly and efficiently. Our brand independence and our broad network further augment our flexibility.

All services in a single overview

Analyser Systems

Design, construction, installation and maintenance of analyser and skid systems in industrial environments, according to the turnkey principle.

About ENGIE Fabricom

ENGIE Fabricom designs, builds and maintains multi-technical facilities for companies and local authorities. Many of its solutions improve mobility, safety, distribution systems and the share of renewable energies, as well as operational and energy performance in industrial environments. ENGIE Fabricom and its subsidiaries are active in both Belgium and abroad. ENGIE Fabricom is part of ENGIE, which develops effective and innovative solutions in four key areas: renewable energy, energy efficiency, liquefied natural gas and digital technologies.

www.engie-fabricom.com

ENGIE Fabricom Maintenance, Services and Panels has workshops in Aartselaar, Lillo and Zwijndrecht but can also come to your site.
