**Analyser Systems**

Design, construction and maintenance  
of analyser and skid systems  
in industrial environments

---

Besides testing in our own laboratory (depicted here), we also conduct tests on your site.

A skid system designed by ENGIE Fabricom Analyser Systems and built in collaboration with ENGIE Fabricom SKID Construction.

## Ready-to-use analyser systems for process control and environmental protection

ENGIE Fabricom Analyser Systems designs, builds and integrates analyser and skid systems for the critical monitoring of liquid and gas flows. We have the people and equipment to efficiently implement all aspects of your integration project, all the way through to installation and maintenance.

### Active in the following sectors

Chemistry

Energy

Infrastructure

Petrochemistry

Steel industry

Government

Incinerators

Certificates

SCC Petroleum . ISO 9001 . ISO 14001

## Wide range of systems and applications

- Systems for the analysis of different flows in an industrial environment: gas, liquid, solid particle and other flows in a process
- Skid systems for various applications
- Explosion-resistant applications in cabins and shelters
- System automation, data acquisition and telemetry
- Skids
- Pilot projects

## All aspects of system integration, from a to z

- Engineering and design
- Assembly and construction
- Internal tests
- Factory acceptance tests
- Pre-commissioning tests
- Installation and putting into service
- Installation on site
- Transport
- Project management

## Full service and support, available worldwide

- Preventive and curative maintenance
- Own lab for tests and repairs
- Always tailored to the customer
- 24/7 availability

### Main advantages

- ✓ Customised comprehensive solution
- ✓ Brand-independent service
- ✓ Certified quality
- ✓ Many years of experience and expertise
- ✓ Extensive engineering capacity
- ✓ Worldwide export and support
- ✓ Own 600 m<sup>2</sup> workshop
- ✓ Own laboratory and testing environment

## About ENGIE Fabricom

ENGIE Fabricom designs, builds and maintains multi-technical facilities for companies and local authorities. Many of its solutions improve mobility, safety, distribution systems and the share of renewable energies, as well as operational and energy performance in industrial environments. ENGIE Fabricom and its subsidiaries are active in both Belgium and abroad.
