

Panel Building

Expertise centre for panel building

Our 4,000 m² workshop meets the most rigorous standards. A strict clean floor policy applies.

We make panels that fulfil your specific requirements.

Everything for your panels, from design to assembly

ENGIE Fabricom Panel Building designs, makes and assembles automation and flow distribution panels. From our brand-independent position we seek the best answer to your request. Our large technical team knows how to handle widely divergent assignments, from high-quality standard products to company-specific solutions.

Active in the following sectors

Automotive

Construction

Chemistry

Energy

Pharmaceuticals

Infrastructure

Shipping

Petrochemistry

Incinerators

Food & drink

Certificates

CE
UL
CSA
EC 61439
SCC
SOS-SCC
ISO 9001
ISO 14001

Always the right solution

We have many years of experience in both mass production and custom work, so we can always offer you the best solution for your specific panel needs. We always seek the optimal price-quality-service relationship and can deliver just in time.

Customisation

Our engineers assist you with advice and support for products with high complexity and very strict operational safety requirements. We guarantee that the design, construction and installation of your panels will perfectly meet your business needs. Everything is thoroughly tested and inspected.

Mass production

In the construction of automation or control panels in small or large series we combine low production costs with a high quality level and flexible service. We are able to quickly produce large volumes without sacrificing quality.

Many possibilities and techniques

- All types of panels and small distribution panels
- Customised, in series, pre-assembled
- Design and detailed engineering
- Okken panels: MCC (4,000 A - 100 kA), PCC (6,300 A - 150 kA)
- Prisma Plus panels up to 4,000 A - form 4, ICC: 85 kA
- ABB panels: Pro E panel & Artu L
- Automation, motor power supplies, power supplies, etc.
- Engravings

Main advantages

- ✓ Broad knowledge of products, techniques and applications
- ✓ Large production capacity
- ✓ Brand-independent
- ✓ Flexibility
- ✓ Just-in-time deliveries
- ✓ Extensive and advanced test facilities
- ✓ Own 5,000 m² workshops
- ✓ Own engraving service
- ✓ Customer service
- ✓ More than fifty years of experience
- ✓ Internationally active
- ✓ Thermography for internal quality control and inspection at the customer's site
- ✓ Full service, from concept through production and installation to training

About ENGIE Fabricom

ENGIE Fabricom designs, builds and maintains multi-technical facilities for companies and local authorities. Many of its solutions improve mobility, safety, distribution systems and the share of renewable energies, as well as operational and energy performance in industrial environments. ENGIE Fabricom and its subsidiaries are active in both Belgium and abroad.
